Research Interests

Edge AI, Video Streaming, Energy Efficiency, Machine Learning, Reinforcement Learning, LLMs.

Education

Ph.D. in Information Technology (In Progress) Sep. 2023 – Present
Universität Klagenfurt, Austria

- Research on **AI**-assisted energy-efficient video streaming
- Supervisors: Professor Christian Timmerer, Professor Radu Prodan
- Advisor: Dr. Reza Farahani

M.Sc. in Artificial Intelligence Sep. 2021 – Jul. 2023
Alma Mater Studiorum – Università di Bologna, Italy

- Thesis: **Deep learning**-based multi-step ahead energy demand forecasting in industrial applications
- Supervisor: Dr. Michele Lombardi

M.Sc. in Electrical Engineering (Telecommunications) Sep. 2012 – Feb. 2015
Iran University of Science and Technology, Tehran, Iran

- Thesis: Nondestructive testing for defect detection of microstrip boards using near magnetic field
- Supervisor: Dr. Majid Tayarani

Experience

University Assistant Sep. 2023 – Present
Universität Klagenfurt, Austria

- **Research Focus**
 - Investigating **AI**-assisted energy-efficient video streaming
 - Exploring **LLMs** for video processing with a focus on sustainability
- **Teaching**
 - Introduction to Structured and Object-Oriented Programming: Instructed foundational programming concepts, emphasizing problem-solving and clean coding practices in Java.
 - Distributed Systems: Taught key concepts including Java RMI, socket programming, web services, distributed algorithms, peer-to-peer systems, virtualization (Docker/VMs), and orchestration (Kubernetes).

- Designed and developed machine learning models for energy consumption forecasting across various industries using historical data.
- Explored and evaluated **different neural network architectures, including CNNs, LSTMs, and other deep learning models.**
- Conducted comparative analysis to identify and propose the most accurate and efficient model for each case study, based on domain-specific requirements and performance metrics.

Academic Research Projects

Sep. 2021 – Jul. 2023

Alma Mater Studiorum – Università di Bologna, Italy

- **Skin Cancer Detection:** Developed a **deep learning** pipeline for skin cancer classification, including image preprocessing and model training using the ISIC dataset.
- **Breast Cancer Detection:** Applied a **Convolutional Neural Network (CNN)** to classify breast cancer subtypes from histopathological images using the BreakHis dataset.
- **Chest X-ray Image Segmentation:** Implemented a **UNet-based** model for segmenting anatomical structures in chest X-rays to assist in automated medical diagnosis.
- **Medical Abbreviation Disambiguation:** Built a **natural language processing (NLP)** pipeline leveraging BERT-based architectures to disambiguate abbreviations in clinical texts, improving understanding and accuracy in medical document analysis.

Reviews

JOURNAL REVIEWER

- *IEEE Transactions on Parallel and Distributed Systems (TPDS)*: 2024–2026

CONFERENCE AND WORKSHOP REVIEWING

- **Sub-reviewer**

- *International Joint Conference on Neural Networks (IJCNN)*: 2025
- *ACM Computing Frontiers (CF)*: 2025–2026
- *ACM Mile-High Video Conference (MHV)*: 2025–2026
- *IEEE/ACM International Conference on Utility and Cloud Computing (UCC)*: 2025
- *IEEE International Symposium on Cluster, Cloud, and Internet Computing (CCGrid)*: 2026

- **Program Committee Member**

- *Workshop on Intelligent and Scalable Systems across the Computing Continuum (ScaleSys)*, in conjunction with IoT 2025
- *Engineering Techniques for Distributed Computing Continuum Systems (EDCCS)*, workshop in conjunction with ICDCS 2026
